Letter of Recommendation for Fair Future Foundation

To Whom It May Concern,

It is with great enthusiasm that Rotary Australia provides this letter of recommendation for *Fair Future Foundation* (FFF). This is an exceptional humanitarian organization that has been working relentlessly for over 15 years, to improve health, sanitation, and overall well-being in some of the most remote and underserved regions of Eastern Indonesia, particularly East Sumba.\

For the past two years, Rotary Australia has been working closely with *Fair Future Foundation*, collaborating on various projects aimed at addressing critical health challenges, improving access to clean water, and providing essential medical care to ultra-rural communities.

Our collaboration has been marked by shared values, dedication, and a deep commitment to making a sustainable impact on the lives of those who lack fundamental resources.

Key Areas of Collaboration

Over the course of our partnership, Fair Future Foundation has demonstrated an unwavering commitment to humanitarian action, particularly in the following areas:

- **Malaria Prevention & Health Programs** – Through initiatives like #ZeroMalaria, FFF has been instrumental in mosquito net distributions, Indoor Residual Spraying (IRS), and health education to combat malaria, dengue, and other vector-borne diseases.
- **Primary Medical Care (PMC) Program** – A revolutionary effort providing first-line medical support through trained community health workers (Kawan Sehat agents) who treat and prevent infectious diseases, childhood illnesses, and injuries in villages that have no access to doctors or clinics.

- Water & Sanitation Hygiene (WASH) Projects – Our collaboration includes the Water Connection Program, aimed at ensuring clean and safe water by building water reservoirs, sanitation facilities, and conducting hygiene awareness campaigns.
- SolarBuddy & Sustainable Energy Access – Rotary Australia and SolarBuddy have partnered with FFF to distribute thousands of solar lamps to children and families who live without electricity, enabling safer living conditions and access to education at night.
- Providing the supply and distribution of RELIEFNET mosquito bed nets, long-lasting insecticidal nets (LLIN), made of durable polyethylene material to hundreds of families in remote villages.

An Organization of Integrity & Impact

Fair Future Foundation operates with exceptional transparency, efficiency, and effectiveness, ensuring that over 93% of all funds and donations directly support field projects. Their commitment to sustainability, local empowerment, and data-driven impact has made them one of the most respected humanitarian organizations operating in Indonesia.

We strongly endorse and recommend *Fair Future Foundation* for any future collaborations, funding opportunities, or humanitarian initiatives. Their dedication, expertise, and grassroots approach make them a valuable and trusted partner in the fight against healthcare inequality, poverty, and access to clean water.

Should you require further information regarding our collaboration and positive and rewarding experiences with Fair Future Foundation, please do not hesitate to contact me.

Sincerely,

John Kevan
Past District Governor
