A day of care, closer to home

Primary Medical Care / Kawan Sehat Agents · East Sumba, Indonesia | Village to be confirmed

BUDGET NEEDED

CHF 850

Total budget required to carry out this project.

Help fund one village medical outreach day: consultations, treatment when needed, and practical health education for around 100-150 people. The team brings care closer to families and connects patients with local Kawan Sehat agents.

WHAT THIS PROJECT AIMS TO CHANGE

- Care for around 100-150 people
- Practical prevention advice
- Follow-up with Kawan Sehat agents

01. WHY THIS PROJECT

Reaching medical care can mean a long journey for families in remote villages. This project will fund one full outreach day under Primary Medical Care, bringing a clinical team, medicines and practical prevention activities to a village in East Sumba. The aim is to assess health needs, provide appropriate treatment and help people understand what they can do at home. Not every consultation requires medicine. Good Health Prescription cards and fabric education posters support clear, practical advice. Fair Future has organised many such days. This request concerns one future outreach, not the whole monthly programme. The village and date will be selected with the local team; attendance and treatment needs will vary. The photographs show previous activities.

02. DELIVERY AND FOLLOW-UP

PLANNED ACTION

A team of around 10-15 people, generally including three doctors, a pharmacy professional, a midwife and logistics staff, will travel in two or three vehicles. Preparation, travel, care, education and return occupy a full day. Supplies and power equipment are arranged for the visit. The CHF 850 funding target covers one complete day of care, health education and field logistics.

BUDGET BREAKDOWN

Expense	Qty	Unit cost	Total
One outreach day: care, health education and logistics	1	850	850

Total · CHF **CHF 850**

RESPONSIBLE TEAM

Fair Future Foundation and Kawan Baik Indonesia, with local Kawan Sehat agents.

INDICATIVE TIMETABLE

Village and date to be confirmed. One complete outreach day, from early departure to return.

HOW WE WILL REPORT BACK

Local Kawan Sehat agents follow patients and return to villages when needed. The team may revisit to assess progress.
