A day of care, closer to home

Primary Medical Care / Kawan Sehat Agents · East Sumba, Indonesia | Village to be confirmed

BUDGET NEEDED

CHF 850

Total budget required to carry out this project.

Help fund one additional medical outreach day in East Sumba, beyond the five already funded by Rotary: consultations, treatment when needed, and practical health education for around 100-150 people, with follow-up by local Kawan Sehat agents.

WHAT THIS PROJECT AIMS TO CHANGE

- Care for around 100-150 people
- Practical prevention advice
- Follow-up with Kawan Sehat agents

01. WHY THIS PROJECT

Reaching medical care can mean a long journey for families in remote villages. Rotary has funded five medical outreach days. The first has been completed; the four remaining funded days are being prepared. This CHF 850 request supports one additional outreach day beyond those five.

Under Primary Medical Care, a clinical team brings medicines and practical prevention activities closer to families. The aim is to assess health needs, provide appropriate treatment and explain what people can do at home. Not every consultation requires medicine. Good Health Prescription cards and fabric education posters support clear, practical advice. The village and date for the additional day will be selected with the local team; attendance and treatment needs will vary. The photographs show previous activities.

02. DELIVERY AND FOLLOW-UP

PLANNED ACTION

A team of around 10-15 people, generally including three doctors, a pharmacy professional, a midwife and logistics staff, will travel in two or three vehicles. Preparation, travel, care, education and return occupy a full day. Supplies and power equipment are arranged for the visit. The CHF 850 funding target covers one additional day of care, health education and field logistics, beyond the five days already funded by Rotary.

BUDGET BREAKDOWN

Expense	Qty	Unit cost	Total
One additional outreach day: care, education and logistics	1	850	850
Total · CHF			**CHF 850**

RESPONSIBLE TEAM

Fair Future Foundation and Kawan Baik Indonesia, with local Kawan Sehat agents.

INDICATIVE TIMETABLE

Village and date for the additional day to be confirmed. One complete outreach day, from early departure to return.

HOW WE WILL REPORT BACK

Local Kawan Sehat agents follow patients and return to villages when needed. The team may revisit to assess progress.
