# Women’s Health and Early Cervical Cancer Detection

Primary Medical Care / Kawan Sehat Agents · Maubokul and Wangga, East Sumba, Indonesia

FUNDING SOUGHT

## CHF 840.23

Requested through Fair Future for KBI’s contribution.

Fair Future and Kawan Baik seek CHF 840.23 to complete KBI’s contribution to two outreach days on 18-19 December 2026, with women’s health consultations, HPV screening and early cervical cancer detection.

**WHAT THIS PROJECT AIMS TO CHANGE**

- Women’s health consultations and cervical screening.
- HPV screening; aiming to reach 50-100 women.
- Local coordination for referral and follow-up.

Lambanapu, East Sumba, 2025: Alandio, a medical volunteer, with a participant during a women’s health outreach day.

## 01. WHY THIS PROJECT

Cervical screening can identify changes that need further assessment before they become more serious. Early detection needs a clear route to follow-up care. Fair Future and Kawan Baik are bringing women’s health services closer to Maubokul and Wangga, alongside general care and health education. The medical team has confirmed gynaecological consultations, HPV testing and TCA availability when clinically indicated and consented to. IVA is also planned. A positive HPV result is not a cancer diagnosis; specialists assess the appropriate next step.

# 02. DELIVERY AND FOLLOW-UP

### PLANNED ACTION

Deliver two outreach days with IKALOGI UNUD specialists, local health staff and community partners. Provide women’s health consultations and HPV screening alongside general care and school health education. IVA is also planned. Specialists assess results and explain further examination, treatment or referral. TCA is available when clinically indicated, after explanation and consent.

### KAWAN BAIK CONTRIBUTION BUDGET

| Expense | Qty | Unit cost | Total |
|---|---|---|---|
| Partner coordination (two locations) | 1 | 83.72 | 83.72 |
| Health education and storytelling | 1 | 105.35 | 105.35 |
| Clinical outreach and operational support | 1 | 674.42 | 674.42 |
| Documentation, editing and reporting | 1 | 116.28 | 116.28 |
| **Total · CHF** | | | **CHF 979.77** |

### RESPONSIBLE TEAM

Fair Future Foundation and Kawan Baik Indonesia, with IKALOGI UNUD specialists, Puskesmas teams and community partners.

### INDICATIVE TIMETABLE

18 Dec morning: GKS Tanarara, Maubokul.
19 Dec, 08:00-12:00 WITA: Kambaniru, Wangga.

### HOW WE WILL REPORT BACK

Specialists are proposed to coordinate clinical follow-up with Kambaniru Health Center; KBI supports patient communication. Final reporting will distinguish activity attendance from unique beneficiaries and identify repeat participants. Record services and expenditure without exposing patient details.

SUPPORTING INFORMATION

# Sites, funding and care pathway

18 December, morning: GKS Tanarara, Maubokul. Target: 100-200 general patients.
19 December: Kambaniru Health Center. Target: 50-100 participants for general and women's health check-ups. The women's health target is additional to the first day's general-patient target. Reporting will identify repeat participants to count unique beneficiaries.

Registration for 19 December takes place in advance via the link on billboards planned for six locations around Waingapu.

KBI's contribution budget: IDR 21,065,000 (CHF 979.77). Medicines already provided by KBI from Rumah Kambera: IDR 3,000,000 (about CHF 139.53). Requested through Fair Future: IDR 18,065,000 (CHF 840.23). Other partners contribute personnel, supplies and operational support. Reference rate: 1 CHF = IDR 21,500; CHF figures rounded individually.

18 December: Maubokul area on Google Maps

19 December: Puskesmas Kambaniru on Google Maps

Ino meets families in Maubokul to prepare the December outreach, 19 November 2026.

Fair Future: cervical cancer, screening and follow-up

WHO: cervical cancer prevention and early detection

SUPPORTING INFORMATION

# Registration and event poster

19 December 2026, 08:00-12:00 WITA, Puskesmas Kambaniru. Register in advance through the organisers' Google Form before 19 December. One form is completed per participant. The same registration link appears on the event poster and billboards planned for six locations around Waingapu. HPV testing and TCA availability have been confirmed by the medical team; procedures depend on clinical indication and informed consent.

Organisers' event poster for 19 December 2026 at Kambaniru Health Center.
